- 8. Brief description:** LUMEN V4 is a renowned lighting conference of Visegrad countries (V4) traditionally organized every two years by the association of Hungarian, Polish, Czech and Slovak lighting societies. Slovak lighting society has been entrusted to host the conference in 2026, after hiatus caused by the COVID period, and to celebrate the 20th anniversary of the conference.

Aim of the conference is to present the newest scientific and professional knowledge and achievements in the field of light and lighting with emphasize on regionally specific problems of the V4 countries. State-of-the-art in lighting

technology will be intermediated by reputable experts, who will share results of their latest work and recent professional experience. The conference will provide space for broad discussion, overview of modern and progressive lighting products, establishment of new business contacts and strengthen those existing. Manufacturers and trading companies will have opportunity to present their products, services and solutions.

Motto of the conference is „Shine up a light!“ to emphasize the irreplaceable role of light for human beings sensitively balanced with tranquility of counterpart darkness. The conference aims to address key topics of today’s lighting and to highlight challenges of emerging topics such as:

- newest achievements of LED lighting technology
- gaps in enhancing implementation of adaptive lighting
- development of technologies for integrative lighting
- all-respectful inclusive lighting for all as the final goal
- new approaches to daylighting of buildings
- utilization of optical radiation to support living organism
- specific lighting applications indoors and outdoors
- photometry and colorimetry – pillars of lighting applications
- optimized design of lighting systems with comprehensive approach
- exploitation of artificial intelligence in lighting applications
- lighting education and professional training
